THE ALL NEW 2018 CROSSOVER HYBRID PROSTHETIC KNEE

2018:
New Integrated
Design.

Patented:
highly adjustable
Tendon and
Two-Position
Quick Release
X/CAM
System.

Walk Mode:
New rubberized
Protective Cover.

X/CAMs:
allow the
highest tuning of
tendon response
within further
progression of
knee flexion.

WALK MODE

No Tools:
make quick
changes
"on the fly"

SPORT MODE

**CrossOver
Tendons:**
provide a return
mechanism that
is variable with
infinitely tunable
resistance.

Crossflex™ wedges: act like knee cartilage.
Three-pack pre-flexion foam wedges for sport activities
pick the wedge degree to suit the activity.

VED bumpers: 75° and 85°
durometer ratings. Interchange
bumpers to address knee performance
during stance phase.

Durable Bike Tech:
CrossOver utilizes a highly
adjustable pneumatic-
hydraulic shock with user
adjusted air pressure.

Infinite Possibilities.

Designed To Accommodate Changes.

CrossOver can be used for everyday walking and -with simple additions/adjustments- can be used for low and high activity sports.

Take A Walk On The Wild Side.

Walking knees are good for walking only and sport knees are not good for walking. That's a big problem for the user with real life transitions from one activity to the next. CrossOver bridges that gap, the world's first hybrid knee that delivers high performance in all activities.

Brian Bartlett inventor and athlete.

Adapts To You. No Tools Required.

TOOL FREE

You will be amazed at what you can do with this knee! CrossOver allows you to make adjustments on the spot with no tools. Shred the hill and then walk to the lodge! CrossOver's got all daily aspects of your life covered.
